Distribution

Step1.

- Distributing on the 入居日

Step2.

- Handing over small goods for free

Step3.

- Checking the E-mail we sended

Distribution

**Handed to over
100 students**

Good points

1. As little work as possible

2. Automatically you can be a

eco-friendly person 😊

by participating our project.

1. As little work as possible

Our project asks participants to bring second-hand things or take them out by themselves.

So, even when there are not enough members to carry out this project, the amount of work could be under control with the help from participants.

Vision

1. Students become more participating ecological activities by the experience joining 3E Eco Cycle
2. Making a new cycle of used goods on campus

**If you have any questions, feel
